Project Design Phase

Problem – Solution Fit Template

Date	20 October 2026
Team ID	
Project Name	Global Olympic Sports Performance Analysis using Tableau
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

Template (filled for this project):

1. CUSTOMER SEGMENT(S) National Olympic Committee strategists, sports investment / funding analysts, and sports journalists and data storytellers.	**5. AVAILABLE SOLUTIONS** Official medal tables, news articles, raw Kaggle CSV files and one-off Excel charts. These show medal counts but not efficiency, investment or host advantage together.	**6. CUSTOMER CONSTRAINTS** Limited data-analysis skills; little time to process thousands of rows; need a free tool that works in a web browser.
2. JOBS-TO-BE-DONE / PROBLEMS Find which countries, regions and sport categories perform best; judge whether investment and hosting improve results; tell clear stories about 34 years of Olympics.	**9. PROBLEM ROOT CAUSE** Data for 60 countries and 18 Games is split across 4 files with ~9,000 rows and no single visual tool combines medals, efficiency, investment and hosting.	**7. BEHAVIOUR** Searching medal tables online, building spreadsheets, asking analysts for reports, comparing countries one by one.
3. TRIGGERS Planning the next Olympic cycle budget; grant allocation rounds; preparing documentary or news coverage; a mentor requesting analysis.	**10. YOUR SOLUTION** Two interactive Tableau dashboards and an 8-scene story built from the 4 related CSV files — KPIs, map, trends, sport categories, regional efficiency, investment bubbles and host advantage — published on Tableau Public and embedded in a Flask website.	**8. CHANNELS OF BEHAVIOUR** **8.1 Online:** Olympic websites, Kaggle, Google searches, sports news and social media. **8.2 Offline:** committee meetings, conversations with coaches and analysts, printed reports.
4. EMOTIONS: BEFORE / AFTER **Before:** overwhelmed by scattered data and unsure which factors matter. **After:** confident, with clear evidence for funding and storytelling decisions.
