Global Olympic Sports Performance Analysis using Tableau

DASHBOARD

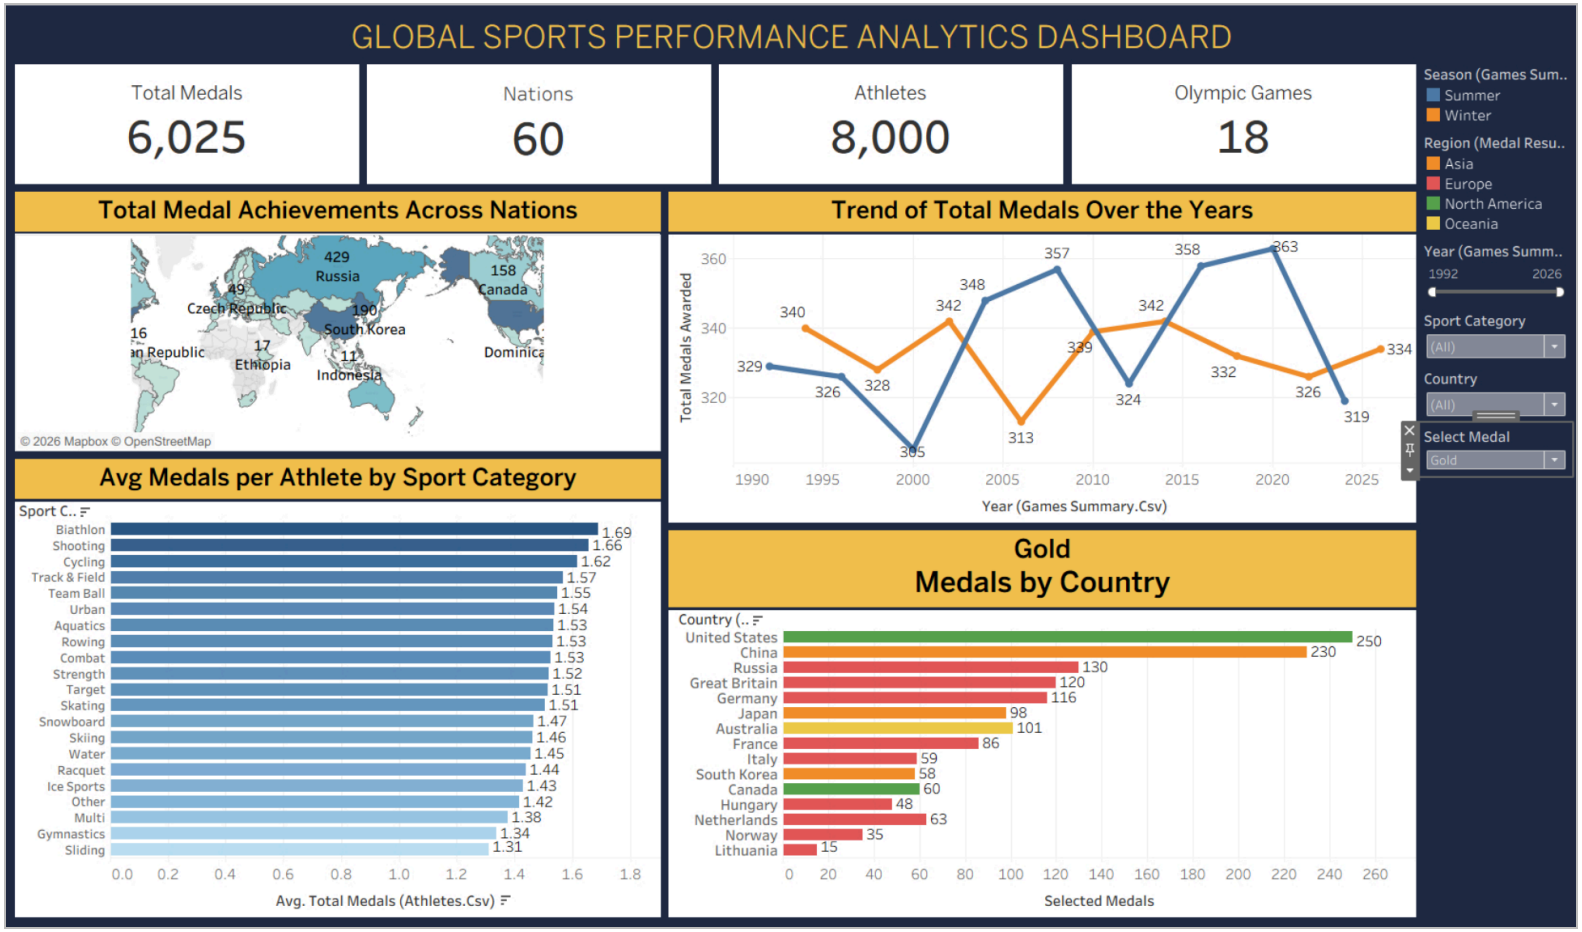

Figure 1: Global Sports Performance Analytics Dashboard (Select Medal parameter set to Gold)

Dashboard 1 combines four KPI cards (6,025 medals, 60 nations, 8,000 athletes, 18 Games) with a world map, the medal trend line, average medals per athlete by sport category and total medals by country. Year (slider), Sport Category, Country and the Select Medal parameter on the right update all charts together. The layout uses Automatic sizing so it adapts to any screen.

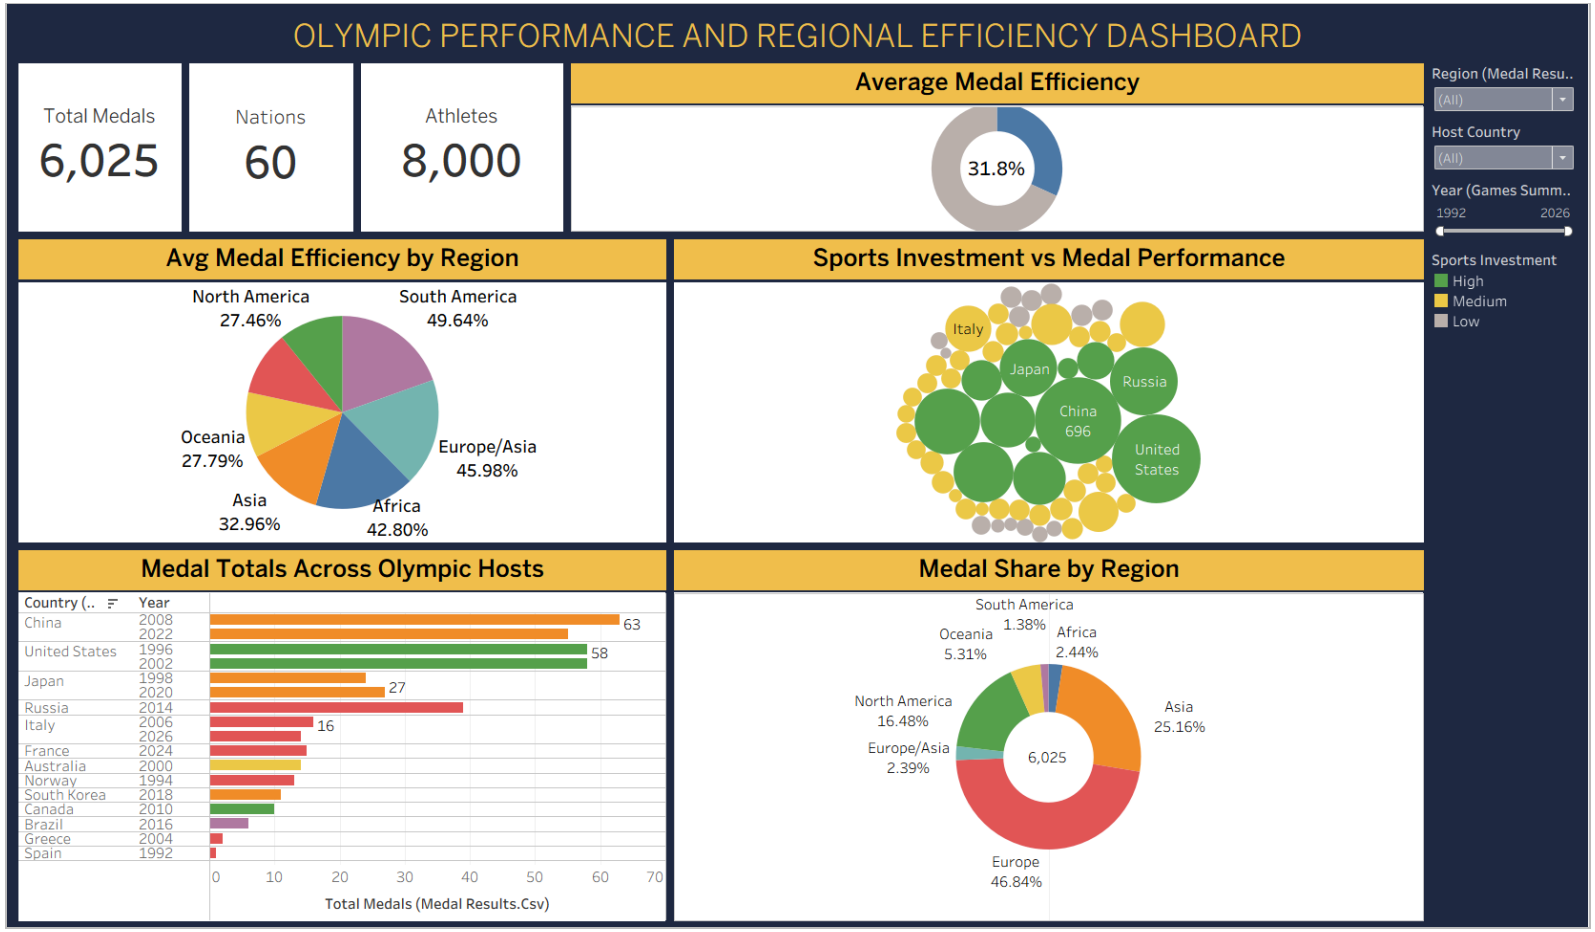

Figure 2: Olympic Performance and Regional Efficiency Dashboard

Dashboard 2 shows the average medal efficiency gauge (31.8%), average efficiency by region, sports investment vs medal performance, medal totals across Olympic hosts and medal share by region, with Region, Host Country and Year filters.

STORY BOARD

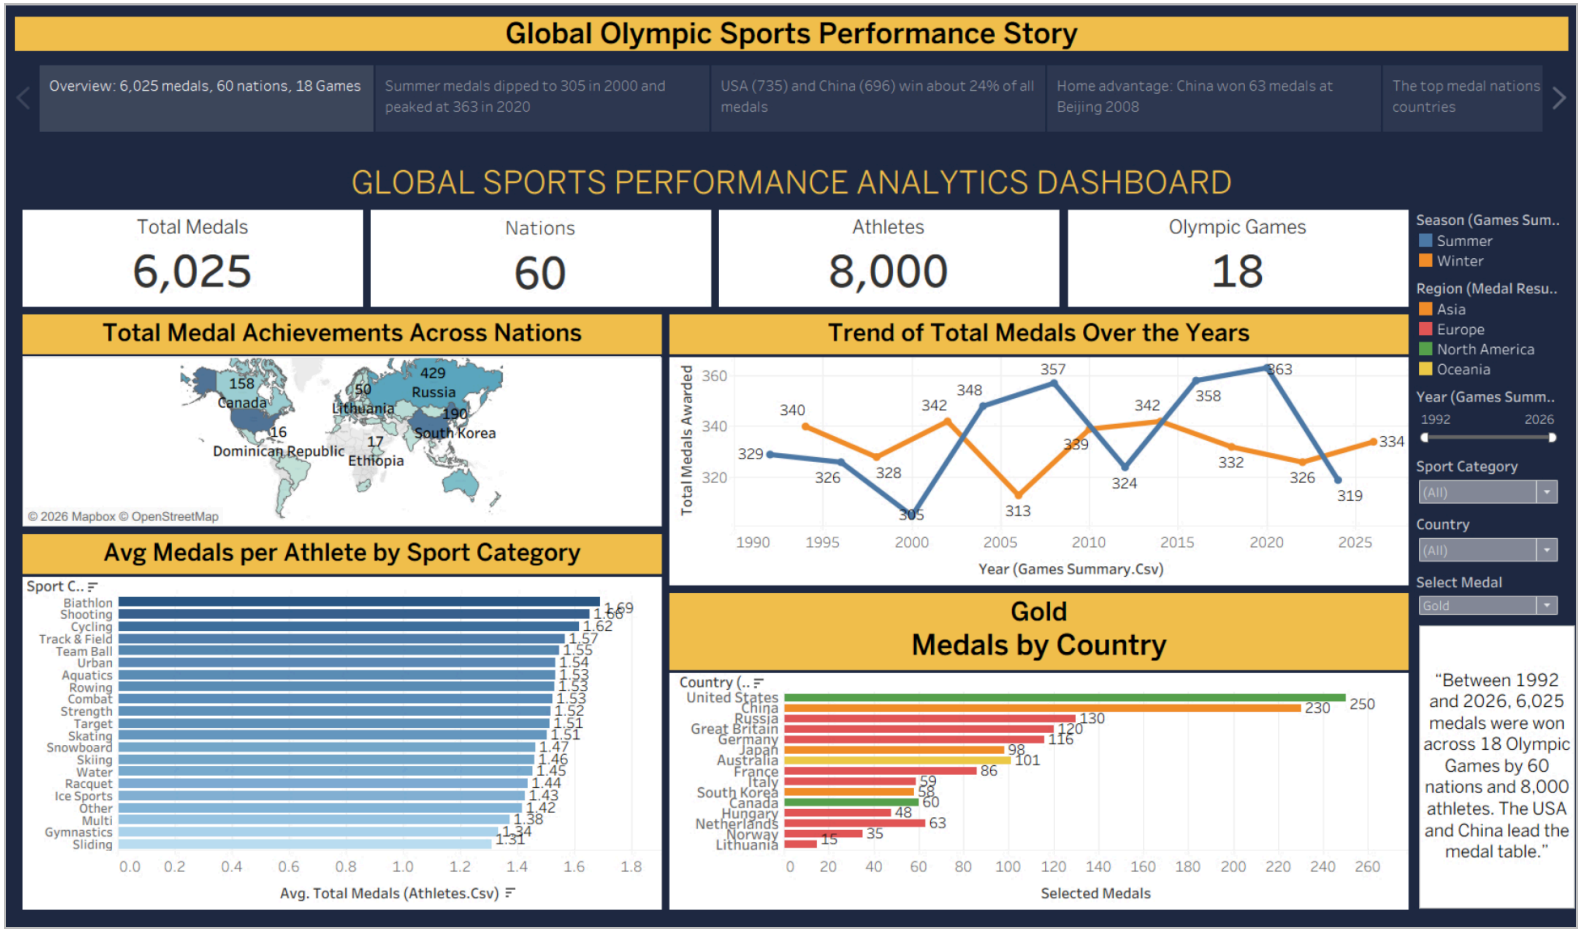

Figure 3: Story Point 1 – Overview: 6,025 medals, 60 nations, 18 Games

Between 1992 and 2026, 6,025 medals were won across 18 Olympic Games by 60 nations and 8,000 athletes. The USA and China lead the medal table.

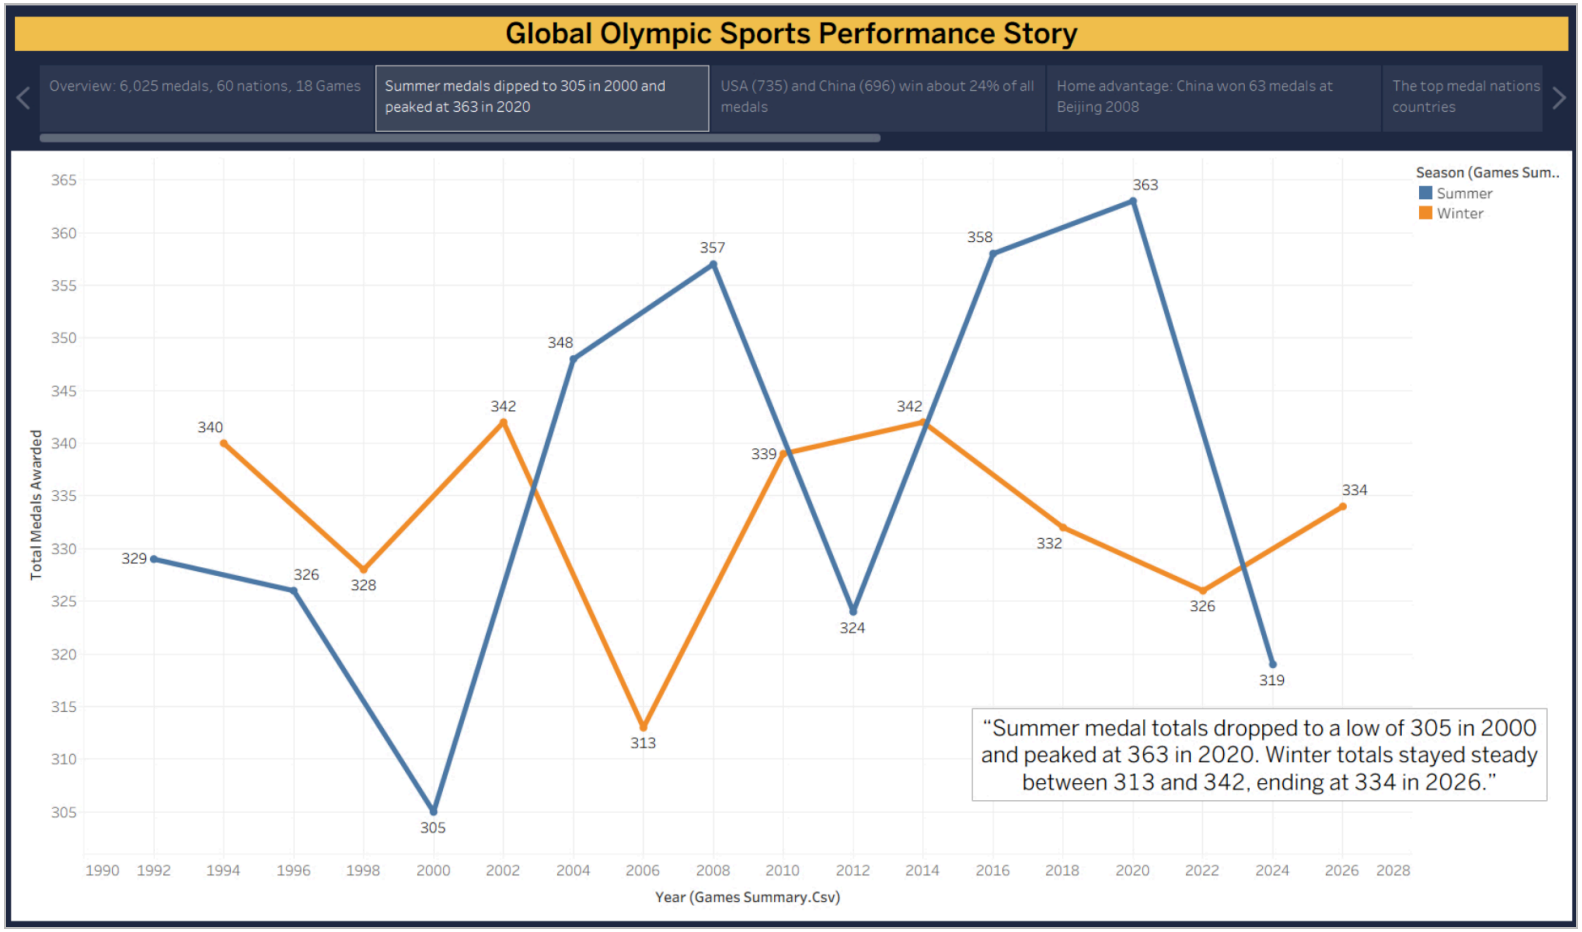

Figure 4: Story Point 2 – Summer medals dipped to 305 in 2000 and peaked at 363 in 2020

Summer medal totals dropped to a low of 305 in 2000 and peaked at 363 in 2020. Winter totals stayed steady between 313 and 342, ending at 334 in 2026.

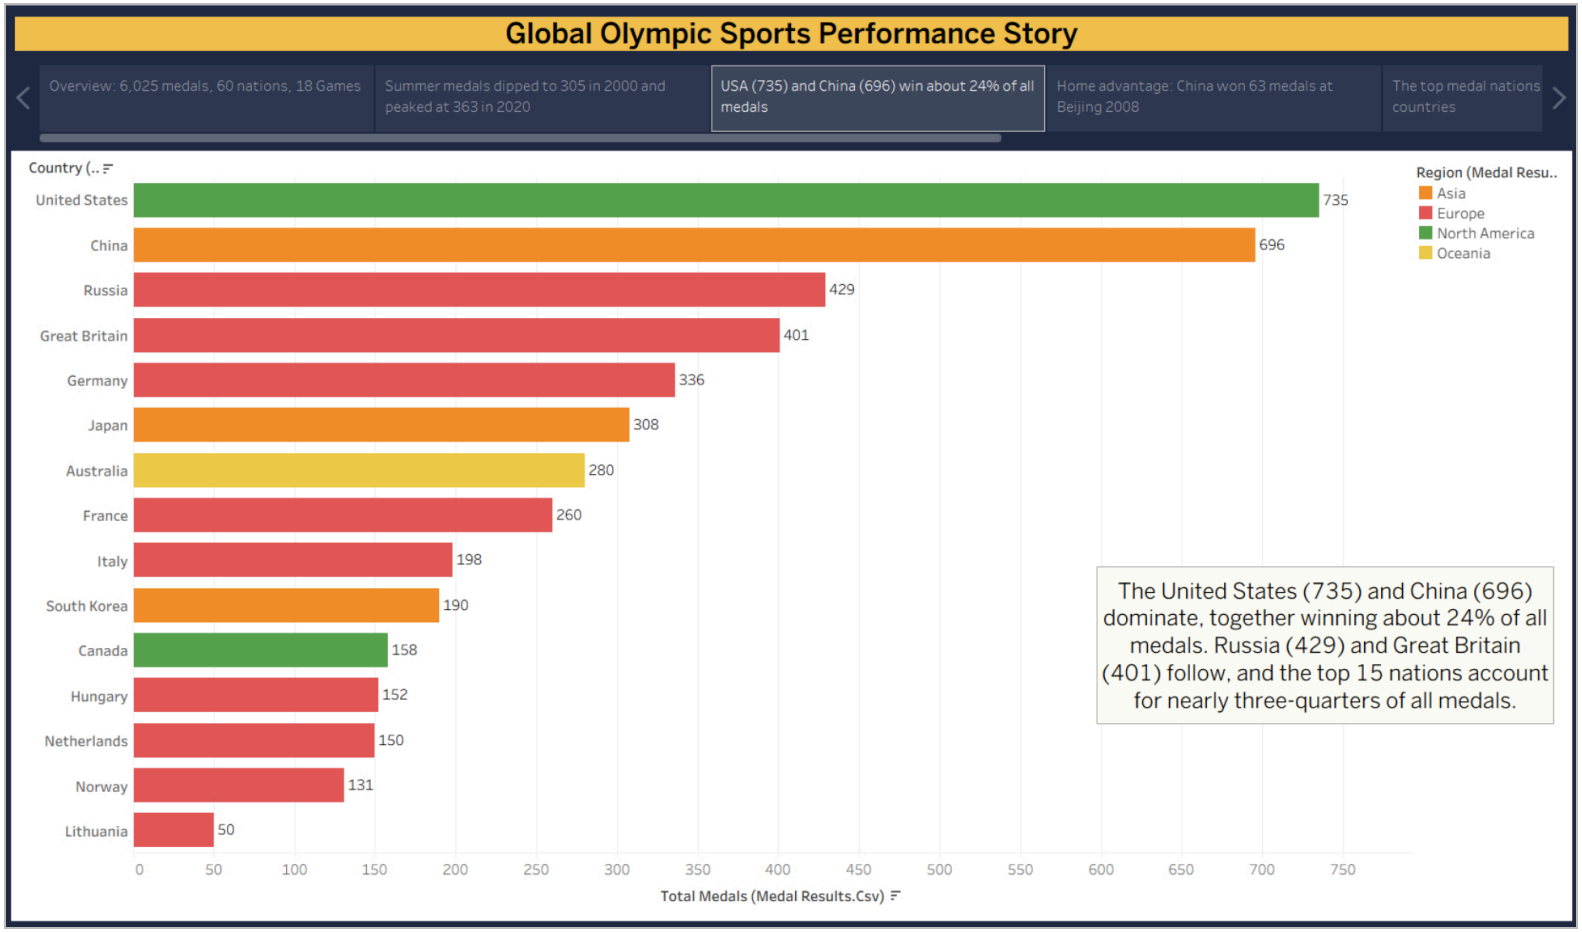

Figure 5: Story Point 3 – USA (735) and China (696) win about 24% of all medals

The United States and China dominate, together winning about 24% of all medals. Russia (429) and Great Britain (401) follow.

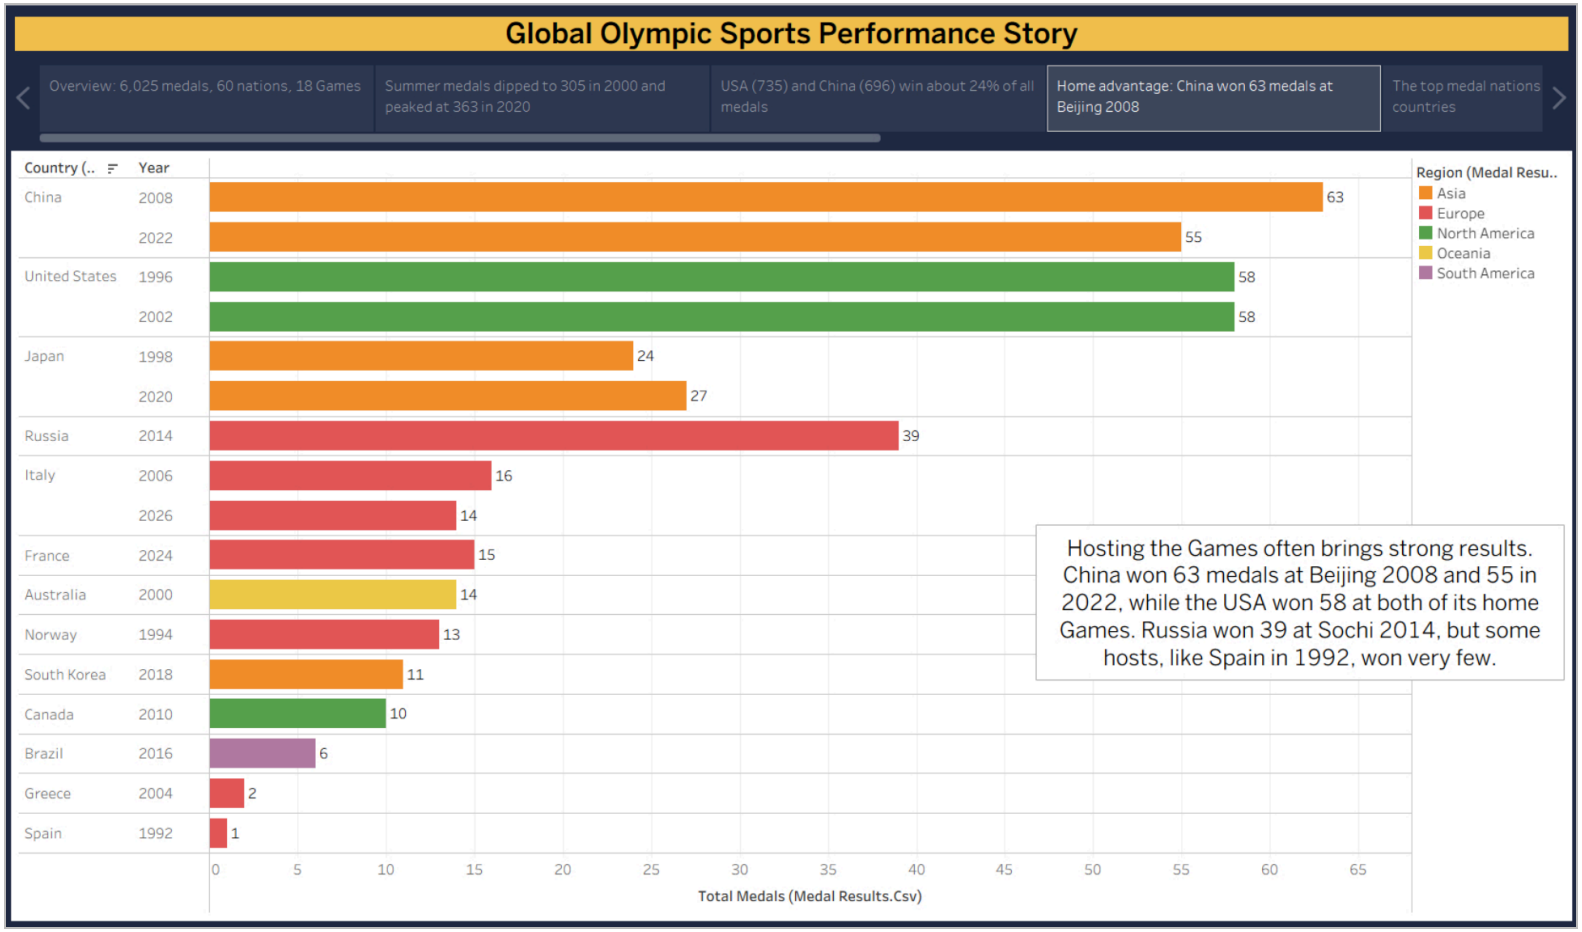

Figure 6: Story Point 4 – Home advantage: China won 63 medals at Beijing 2008

Hosting the Games often brings strong results: China won 63 medals at Beijing 2008 and 55 in 2022, while the USA won 58 at both of its home Games.

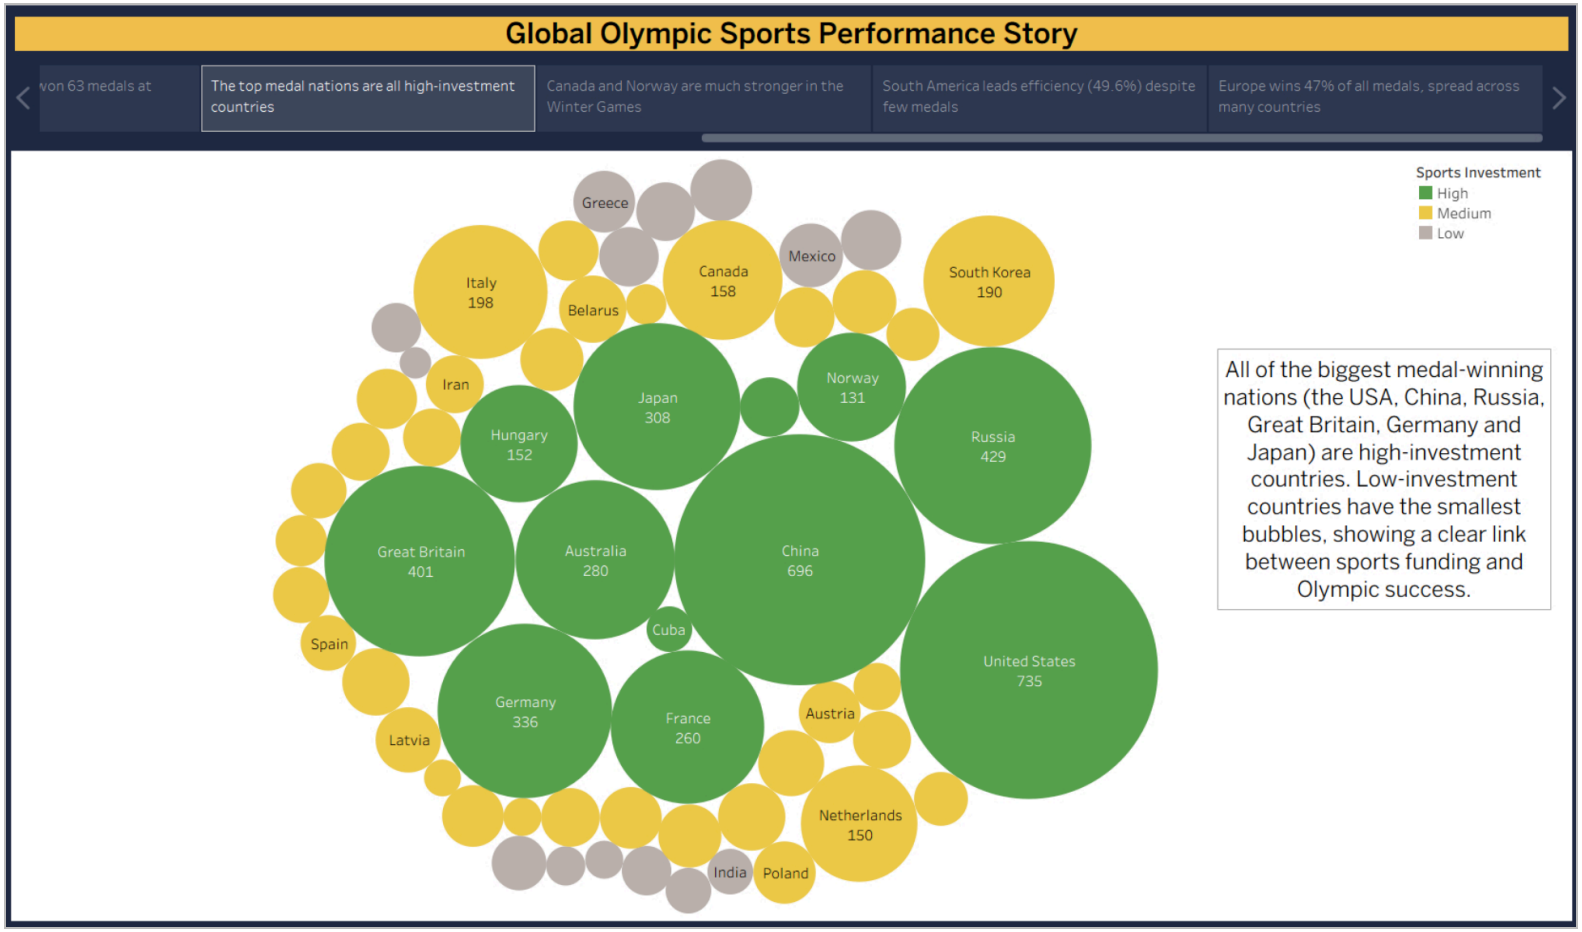

Figure 7: Story Point 5 – The top medal nations are all high-investment countries

All of the biggest medal-winning nations are high-investment countries, showing a clear link between sports funding and Olympic success.

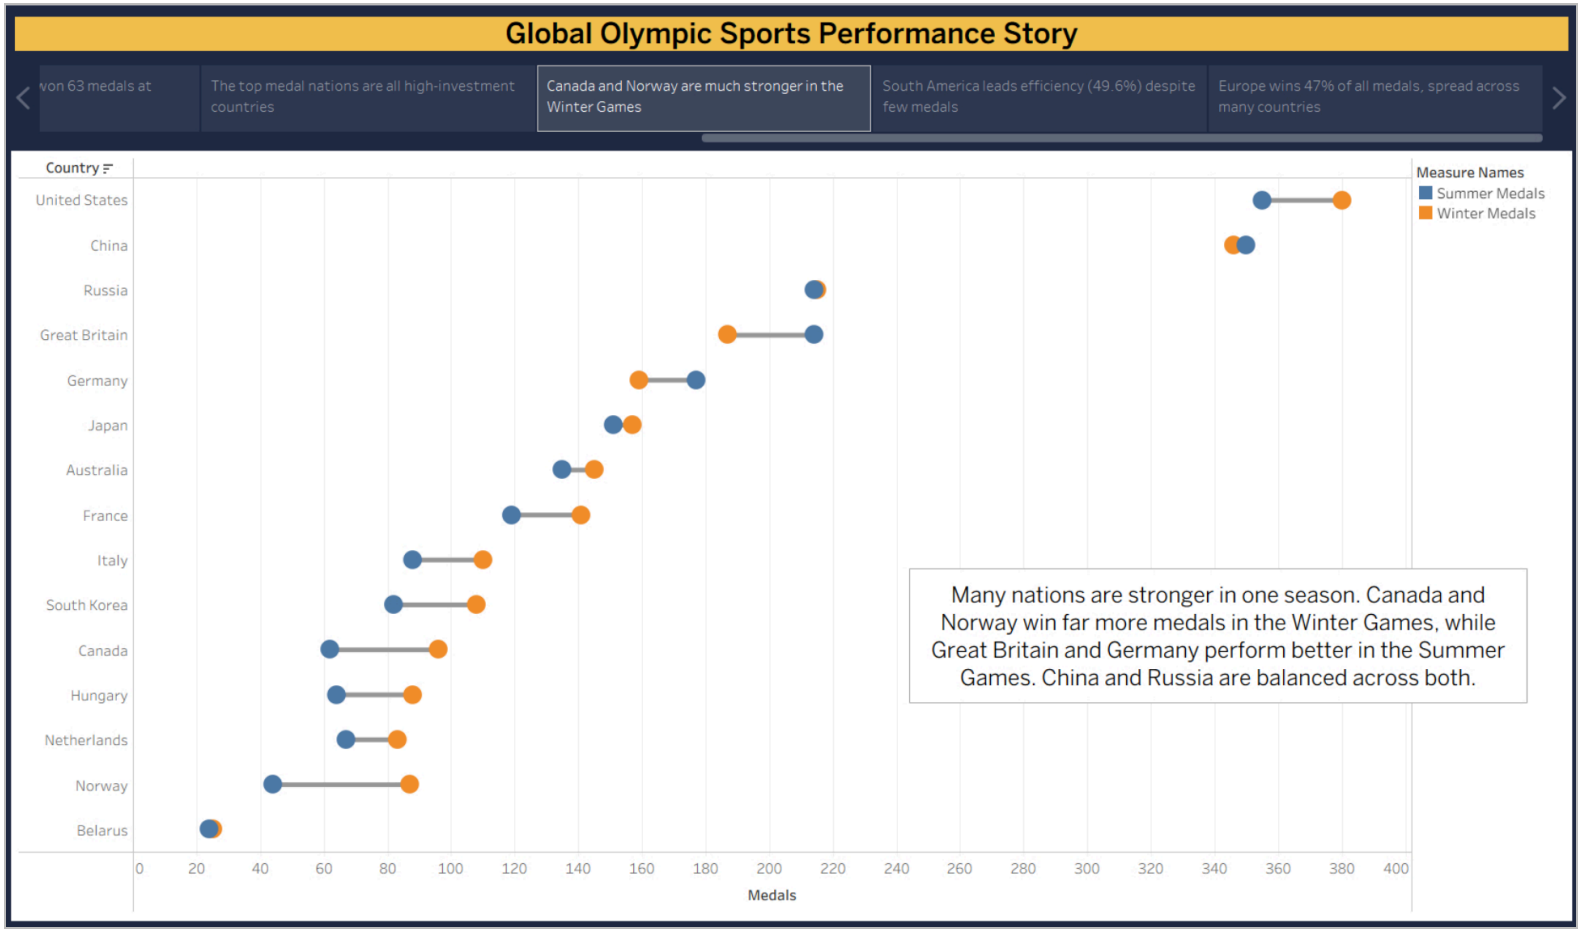

Figure 8: Story Point 6 – Canada and Norway are much stronger in the Winter Games

Many nations are stronger in one season. Canada and Norway win far more medals in Winter, while Great Britain and Germany perform better in Summer.

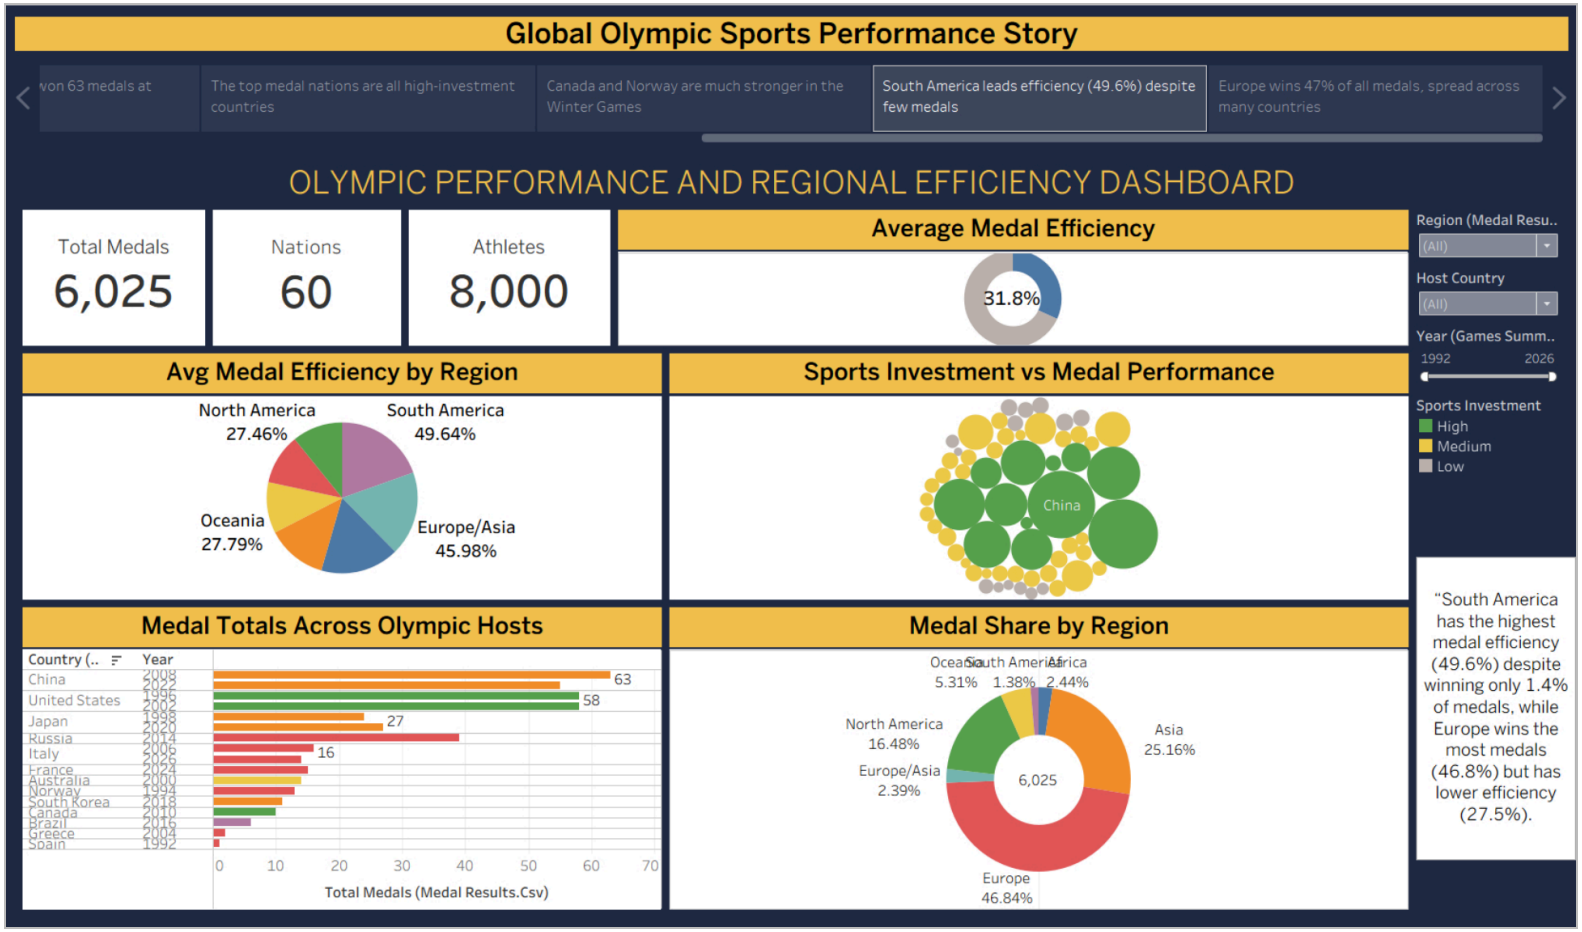

Figure 9: Story Point 7 – South America leads efficiency (49.6%) despite few medals

South America has the highest medal efficiency (49.6%) despite winning only 1.4% of medals, while Europe wins the most medals (46.8%) but has lower efficiency (27.5%).

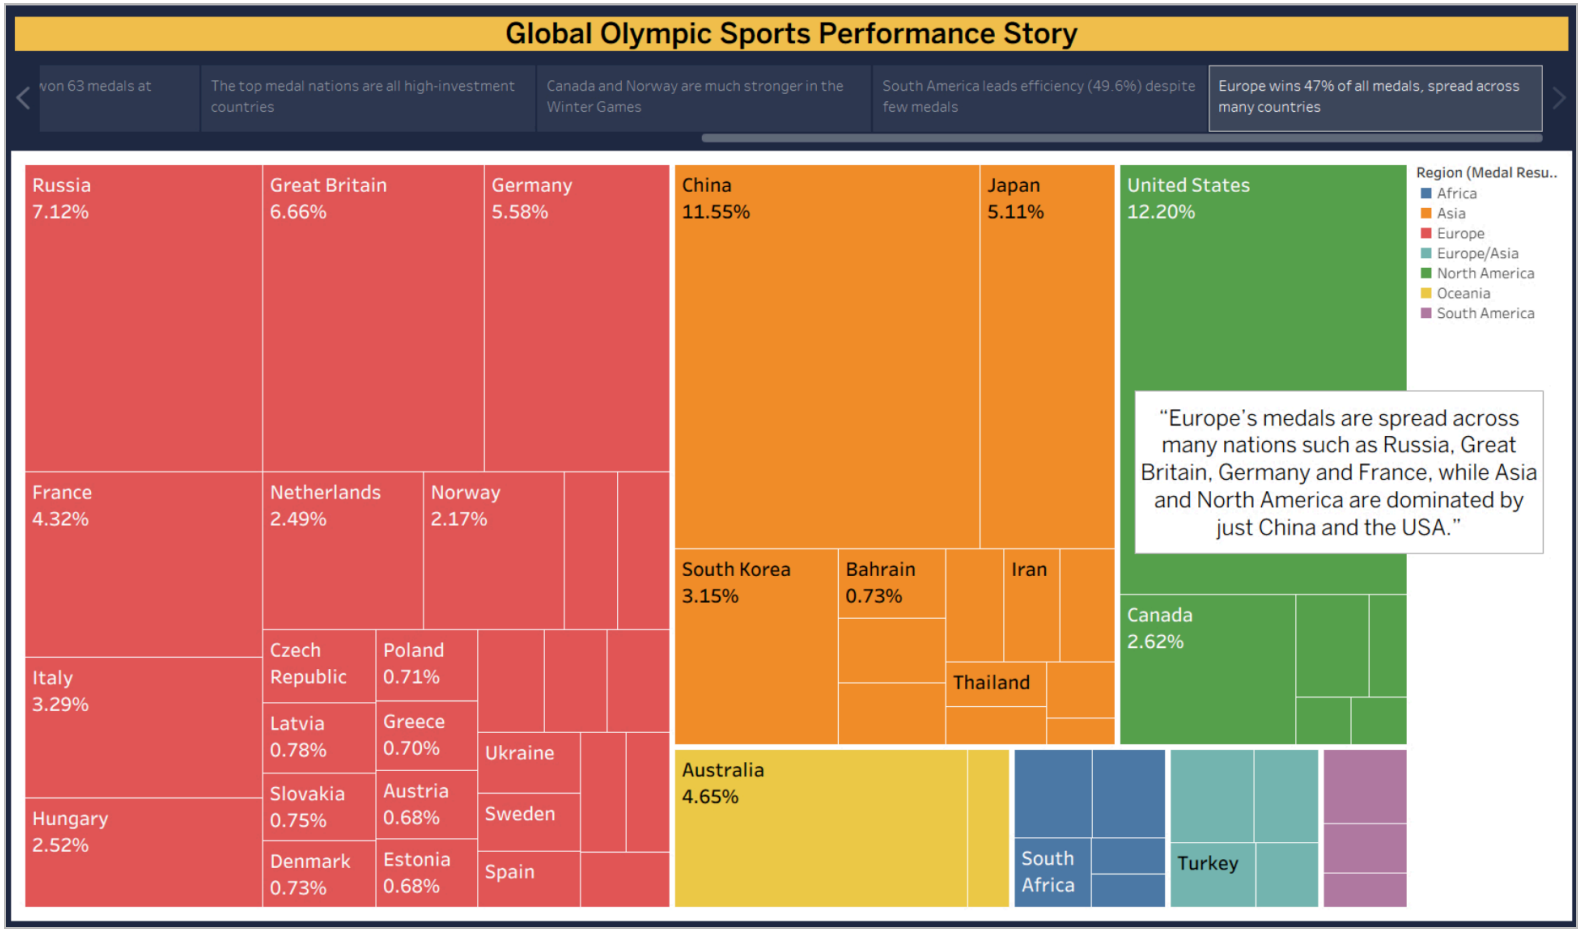

Figure 10: Story Point 8 – Europe wins 47% of all medals, spread across many countries

Europe's medals are spread across many nations such as Russia, Great Britain, Germany and France, while Asia and North America are dominated by China and the USA.
